Summary

Full-stack developer (B.Tech CS, 2025) specializing in **React.js**, **Next.js 15**, **TypeScript**, and **Tailwind CSS** with hands-on experience in **Node.js** and **MongoDB**. Built and deployed **3 production-ready projects** including an AI travel planner with real-time database and a MERN social-video platform — integrating **Groq AI**, **OpenAI**, **Convex**, and **Clerk**. Active tech blogger on **Hashnode**.

Technical Skills

Frontend: React.js, Next.js 15 (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, Redux Toolkit, Framer Motion
Backend: Node.js, Express.js, REST APIs, MongoDB, Mongoose, Firebase, Convex (real-time DB)
Auth & APIs: JWT, Clerk (Google OAuth), Firebase Auth, OpenAI API, Groq API (LLaMA 3.1), Pexels API
Tools: Git/GitHub, Vercel, Postman, VS Code, GSAP, Shery.js
CS Cores: Data Structures & Algorithms, OS, Computer Networking, SQL

Projects

AtlasMind — AI Travel Planner {*Next.js 15 · TypeScript · Groq AI · Convex · Clerk · Vercel*}

- Engineered full-stack AI Travel Planner with **Next.js 15 App Router** & **TypeScript**; built multi-turn chatbot (**Groq LLaMA 3.1**) that auto-generates personalized itineraries with hotels & day-by-day plans via prompt engineering.
- Architected **Convex real-time DB** + **Clerk Google OAuth**; implemented **React Context API** with custom hooks for global state across **15+ components** with middleware-protected routes.
- Shipped UUID-based public trip sharing, **PDF export**, **Pexels API** hotel images with **Framer Motion** animations; deployed to **Vercel** production.

TweetTube — Social Video Platform {*MERN Stack · JWT Auth · REST APIs*}

- Built full-stack **MERN** app combining YouTube-style video streaming with Twitter-style feeds — supports uploads, playback, and social interactions.
- Secured **REST APIs** with **JWT**, cookie sessions, and bcrypt — protected routes for multiple user roles across client and server.
- Optimized **React** rendering with memoization and lazy loading for consistent performance across devices.

Netflix-GPT — AI Movie Recommendation System {*React · Tailwind CSS · Firebase · OpenAI API*}

- Integrated **OpenAI GPT API** for context-aware recommendations with multi-language natural-language search over a live TMDB dataset.
- Built **Redux** state layer with **Firebase** auth — cut redundant API calls across **10+ components**; delivered pixel-accurate Netflix UI with **Framer Motion**.

Internship

Web Development Intern *June 2024 — VerveBridge (Remote)*

- Converted **8+ Figma mockups** into responsive, cross-browser pages using **HTML5**, **CSS3**, and **JavaScript** — improvements tracked by the product team.
- Integrated **GSAP** and **Shery.js** scroll-triggered animations, reducing bounce rate on **3 key landing pages**.
- Shipped reusable component library in an **Agile** sprint using **Git** branching, coordinating across backend and design teams.

Education

A.P.J Abdul Kalam Technical University *2021 – 2025*
B.Tech — Computer Science · **SGPA: 7.8** *Mathura, Uttar Pradesh*

Extracurricular

- Writes technical blogs on **Hashnode** covering frontend concepts, project breakdowns, and learnings — building a consistent public developer presence.
- Active participant in **Tech Benchers Community** — attended workshops and peer sessions on web development and DSA.
